Wednesday, 25 January 2012

The brightest graduate talent is now even easier to find

Introducing a more refined CV search system from graduate-jobs.com

graduate-jobs.com the first job board to create a graduate specific CV search system over 10 years ago has added new unique features to their existing system.

Recruiters can now actively find specific graduates with a **new array of unique search criteria including, UCAS points, university attended, work experience, graduation year, degree level and degree subject.**

For the first time recruiters can contact graduates directly querying the database with questions like, *“show me all graduates who have at least 300 UCAS point, attended a Top20 Uni, have work experience, who wish to work in Sales or Customer Service in London, graduating in between 2010 and 2012”*

Operations Director Gerry Wyatt says “We have a commitment to make our products deliver the best ROI in the market. These enhancements are on top of an already effective CV search service which has been in operation for over 10 years and used by hundreds of recruiters. These extensions are in direct response to our client feedback and we are excited that they will be able to get even better ROI from the site.”

- New search criteria includes, UCAS points, University attended, University range e.g. Top 10/20/50, work experience, driving license, year of graduation and location
- On average 650 new CVs created each week
- Active CV database of over 50,000 CVs
- CV searching costs from as little as £99 when booked with a standard 7 day package

All about graduate-jobs.com

graduate-jobs.com registers one in five of all UK graduates and is the only W3C ‘AA’ rated accessible graduate job board in the UK. Created by two college friends the company has independently grown to a turnover of more than £1m. We aim to allow both SMEs and large companies a level playing field in order to attract University graduates. Since inception we have guided thousands of graduates onto the first stage of their careers.
